To All Franklin County Employees:

Many changes are happening at the current Courthouse and the Campbell Building. With these changes, the parking situation for our employees and for the public is a major concern.

As a courtesy to the surrounding businesses, employees are asked to **avoid** the street parking area on the outside of the square, including the spaces directly in front of the Campbell Building. These spaces should all be left available for customer parking. If you do have a handicap plate/sign, spaces designated to accommodate handicap parking are available on the outside of the square.

Also as a courtesy to our customers, you are also asked to **avoid** the east parking lot attached to the Campbell Building. This will be set up for handicap parking and will also be used by Sheriff's office for court purposes.

Any other public parking areas around the square, side streets, or city parking lots will be available parking for our employees.

Franklin County has also purchased the old Benton Evening News building and will be demolishing that building and creating another parking lot in the next couple of months which will also be available for employee parking.

The First Baptist Church, 201 South Main, will also allow the employees to park on the west side parking area and the south side gravel area of their parking lot. They have asked that we do not park on the south side asphalt parking area. Please respect their request for their property.

R & R Motor Sports has also stated that **no one** will be allowed to park on their property. Please respect their request for their property.

You will be notified as more parking areas are secured for our county employees.

Regards,

Randall R. Crocker, Chairman
