Camera system upgrade

Darla,

Per my site visit and conversation with Jennifer, I have priced upgrading your existing cctv system.

AST would replace the existing DVR's, power supplies located in the equipment room, AST would also provide a rack mountable battery backup unit for the DVR's and power supplies so no video is lost during a power outage.

AST would replace (3) monitors in the control room, AST would also provide (3) coax cable to HDMI converters to improve the resolution/picture quality in control.

AST would replace (25) existing cameras with new vandal proof 5mp IR cameras, the (23) existing cameras that are currently working would remain.

AST would replace all of the existing twist on headend coax connectors with new compression connectors (48) and on the (25) new cameras in the field.

AST will install client software for reviewing both live and recorded video in the admin office on owners existing computer

Material to be provided:

- *(3) DVR's with 8 tb hard drive
- *(25) vandal proof 5mp IR camera assy
- *(3) power supplies
- *(1) Battery backup unit
- *(3) 1080p 22" monitors
- *(3) coax to hdmi converter
- *(75) compression connectors

Labor to be provided:

- *AST would provide labor to install all AST provided equipment listed above
- *AST will provide labor to aim and focus new cameras after installation.
- *AST will provide labor to install client software on owner's computer in admin for retrieving video.
- *AST will provide owner with training on system.

advanced systems technology, inc.

Exceptions and conditions:

*Existing cable from DVR to camera location to be used, if cable needs replaced this would be done on a time and material basis only if approved by the owner.

*The (23) existing cameras that are working would be left alone except for replacing the coax connector at the DVR.

Warranty:

All equipment will come with a one-year warranty and thirty days on labor.

Price \$27,625.00 (no taxes included if req.)

Thanks
Jerry
